Performance highlights – Q3 2024

The Evelyn Partners International MPS range continued to deliver positive returns, ranging from 3.4% to 1.5%. Unusually, it was the lowest risk strategy that delivered the best return and our highest risk strategy – maximum growth delivering the lowest at 1.5%, as bonds outperformed equities over the period.

Equities

During Q3, global equity markets remained largely unchanged, though there was notable volatility. US mega-cap names (Nvidia, Microsoft, Alphabet, Meta, Amazon, Apple, and Tesla) initially dragged global equity benchmarks lower at the start of August but made a swift recovery later in the month. Geopolitical events impacted markets in September, but the beginning of the interest rate cutting cycle in the US provided support.

Our recently added thematic strategy, Polar Capital Global Insurance, performed exceptionally well, delivering a return of 8.9%, benefiting from favourable sector tailwinds. Guinness Global Equity Income also performed well during the quarter with a 5.0% as its overweight to consumer staples and industrials sectors as well a good stock selection aided performance.

At the end of September, China announced its biggest stimulus package since the pandemic to revive the economy and meet the government's growth targets. This provided a welcome boost to the region, resulting in our Asian funds collectively gaining 2.1%.

In Europe, the Blackrock Continental European Flexible fund faced challenges, declining by -1.2% as its top-weighted holdings, Novo Nordisk and ASML, experienced declines of approximately 20%. We also hold Vanguard FTSE Developed Europe ex UK ETF to provide broad European exposure, which fared better, delivering a 2.0% and counteracting the decline from Blackrock.

Within the US, the S&P 500 delivered a positive return of 2.0%, despite the negative currency translation effects, as euro appreciated by 4.0% against the US dollar. We hold the hedged EUR share class of Edgewood US Select Growth and therefore mitigated this headwind, whereas GQG US Partners faced the double whammy of the Mag 7 struggling and the negative currency translation effects to fall by -3.9% in euro terms.

Our Japanese holding performed well over Q3, supported by its growth-oriented style, to end the quarter up 6.7%

Fixed Income

Amid easing inflation and a softening economic environment, the US Federal Open Market Committee (FOMC) made its long-awaited first interest rate cut at the 18 September meeting. The committee voted to cut interest rates by 50 basis points, a more significant reduction compared to the 25 basis point cuts by the Bank of England and the European Central Bank.

This differential in interest rate cuts led to US Government debt exposure outperforming the European, with returns of 3.9% versus 3.1%. The Brown Advisory Sustainable Total Return fund was the best performer within fixed income, achieving a 4.7% return. This success was driven by curve steepening positions in Europe, Canada, the UK, and the US, as well as a core long position in New Zealand. The strategic bond manager, Vontobel TwentyFour, also performed well, delivering a 3.8% return.

During the quarter, we exited the Capital Global High Income Opportunities fund due to an unfavourable risk-to-reward outlook, given the historically tight global high yield spreads.

Alternative Assets

We continue to maintain a diverse selection of alternative funds with differentiated return drivers, which collectively made a positive contribution to our portfolios this quarter.

Real assets benefited from the interest rate cuts, with Schroder Global Cities delivering a strong gain of 9.1% and Greencoat Renewables Plc, which continues to operate as we expect delivered a 9.4% return. Gold continued its ascent amidst ongoing geopolitical risks and a weakening US dollar., while the .

Our two absolute return funds provided returns, ranging from 2.5% to -0.5%.

Underlying top holding – Microsoft

Microsoft is a diversified tech giant with strong revenue streams from cloud computing (Azure), productivity software (Office 365), and gaming (Xbox). Its consistent innovation, robust financial health, and strategic acquisitions like LinkedIn and GitHub have helped drive growth. Microsoft's recurring revenue model ensures stability, while its leadership in AI and cloud services positions it well for future trends. The company's commitment to shareholder returns through dividends and buybacks adds to its investment appeal.

Cloud computing growing at 27%

Microsoft's cloud computing segment (Azure), has been experiencing robust growth. The compound annual growth rate (CAGR) for cloud revenue is 27%

AI Revenue >\$10 Billion in 2025

Microsoft's AI segment is projected to see significant growth in 2025. Analysts from Piper Sandler expect Microsoft's AI revenue to surpass **\$10 billion**.

Microsoft has high barriers to entry exemplified by its growing user base of teams leading to **high retention rates and reoccurring revenues**.

Cloud Computing and AI are the two pillars of Microsoft's corporate strategy

Security, AI and productivity and collaboration tools are Microsoft's key areas of focus.

Fund Focus – GQG US Partners

About the strategy

GQG Partners seeks to invest in high-quality, attractively priced companies exhibiting competitive advantages. Their investment process aims to evaluate each business with a focus on financial strength, sustainability of earnings growth, and quality of management. The resulting portfolio seeks to manage the downside risk of equity investments while providing attractive returns to long-term investors over a full market cycle

Philosophy

Forward-looking quality is less reliant on backward-looking statistical measures and places a heavy emphasis on qualitative assessments of barriers to entry, sustainability and overall industry dynamics.

Strong historical performance across all measures.

Important information

Always remind your clients that the value of investments and the income derived from it can go down as well as up and investors can get back less than they originally invested. Past performance is not a guide to the future.

Funds which invest in specific sectors may carry more risk than those spread across a number of different sectors. In particular, gold, technology and other focused funds can suffer as the underlying stocks can be more volatile and less liquid.

Bonds issued by major governments and companies will be more stable than those issued by emerging markets or smaller corporate issuers; in the event of an issuer experiencing financial difficulty, there may be a risk to some or all of the capital invested. Please note that historical or current yields should not be considered a reliable indicator of future performance.

Targeted absolute return funds do not guarantee a positive return and you could get back less than you invested, much like any other investment. Additionally, the underlying assets of targeted absolute return funds generally use complex hedging techniques through the use of derivative products.

Due to their nature, specialist funds can be subject to specific sector risks. Investors should ensure they read all relevant information in order to understand the nature of such investments and the specific risks involved.

Different funds carry varying levels of risk depending on the geographical region and industry sector in which they invest. You should make yourself aware of these specific risks prior to investing.
